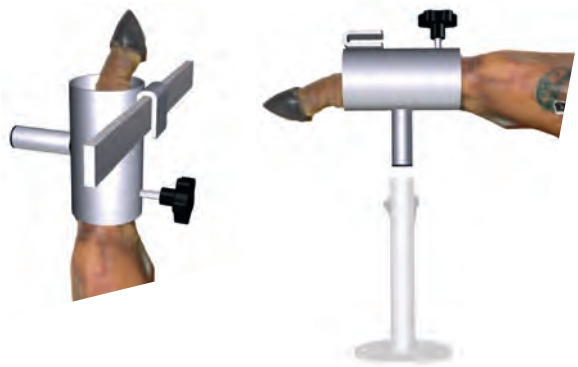
Novedad New Nouveau

Mundo del jamón
World of ham
Monde du jambon

Les presentamos el nuevo sistema RT de sujeción, con un solo punto de apoyo, diseñado para la presentación, corte y almacenamiento del jamón.

RT clamping system, with a single supporting point, designed for presentation, cutting and storage of ham.

Système de fixation RT, avec un seul point d'appui, conçu pour la présentation, la coupe et le stockage du jambon.



With our innovative RT support system you can move the ham from the display bar to the ham holder instantly.

The ham is easily exchangeable. The built-in RT coupling tool is designed to instantaneously place the ham in the ham holder.

Avec notre nouveau système de support RT, vous pouvez déplacer le jambon de la barre d'exposition au support de jambon en un instant.

Facile échange de jambon à couper. L'outil de couplage RT intégré est conçu pour placer instantanément le jambon dans le porte-jambon.

Con nuestros novedoso sistema de soporte RT podrá trasladar el jamón de la barra expositora al jamonero en un instante.

Fácil intercambio del jamón a cortar. El útil de acoplamiento RT que incorpora está diseñado para colocar instantáneamente el jamón en el jamonero.

FRICOSMOS

Profesional, este sistema le ayudará a exponer mejor el jamón, colocándolo en la posición más adecuada en cada momento, favoreciendo la facilidad y efectividad del corte.

Professional, this system will help you to display the ham better. In addition, you will be able to place it in the most appropriate position at each moment to cut it in an easy and effective way.

Professionnel, ce système vous aidera à mieux exposer le jambon, en le plaçant dans la position la plus appropriée à chaque moment, en favorisant la facilité et l'efficacité de la coupe.

Higiénico, al tener un solo punto de apoyo y quedar el jamón suspendido, las labores de limpieza se facilitan al máximo.

The ham is hold with one single supporting point, which results in an easy cleaning and better hygiene.

Hygiénique, n'ayant qu'un seul point d'appui et laissant le jambon suspendu, les tâches de nettoyage sont facilitées au maximum.

Con nuestros útiles de acoplamiento RT puede tener varios jamones expuestos y preparados para cortar en cualquier momento.

With our RT coupling tools you can have several hams displayed and ready to cut at any time.

Avec nos outils de couplage RT, vous pouvez avoir plusieurs jambons exposés et prêts à couper à tout moment.

Este novedoso sistema permite:
Rotación 360º en dos dimensiones (Modelos RT-2D)
Rotación 360º en tres dimensiones (Modelo RT-3D)

This innovative system allows:
360º rotation in two dimensions (Models RT-2D)
360º rotation in three dimensions (Model RT-3D).

Ce système innovant permet:
Rotation à 360º en deux dimensions (Modèles RT-2D)
Rotation à 360º en trois dimensions (Modèle RT-3D)

Características de fabricación:

La hoja del cuchillo está fabricada con molibdeno vanadio recubierto de una capa de titanio de color azul. El principal beneficio que aporta el titanio es que no es tóxico ni alérgico, y como es un material que no genera iones de hierro, evita que la comida pueda oxidarse. El titanio además es muy resistente a la corrosión y a la abrasión y es muy fácil de limpiar porque es extremadamente deslizante.

Mango ergonómicamente diseñado, fabricado en polipropileno resistente hasta 80ºC.

Manufacturing characteristics:

The knife blade is made from molybdenum vanadium coated with a layer of blue titanium. The main advantage is that titanium is not toxic or allergic. In addition it does not produce iron ions so that it prevents food from oxidizing. Titanium is also highly resistant to corrosion and abrasion and is very easy to clean because it is extremely non-stick.

Ergonomically designed handle, made of polypropylene heat resistant up to 80°C.

Caractéristiques de fabrication:

La lame du couteau est fabriquée à partir de molybdène vanadium revêtu d'une couche de titane bleu. Le grand avantage est que le titane n'est pas toxique ou allergique. En plus, il ne produit pas d'ions de fer afin qu'il empêche l´oxydation des aliments. Le titane est également très résistant à la corrosion et à l'abrasion et est très facile à nettoyer car il est extrêmement anti-adhésive.

Poignée ergonomique, en polypropylène résistant à la chaleur jusqu'à 80°C.

Características de fabricación:
Elegante, de líneas limpias y depuradas, así nace el diseño de Meeting ®.
Esta versión de acero inoxidable se presenta sobre madera de roble de Borgoña.
Materiales atemporales y elegantes, Meeting ® sabe mezclar estética y funcionalidad.

Manufacturing characteristics:
The «Meeting®» design is about clean, uncluttered lines coupled with highquality materials.
Available in an all stainless steel version, as well as in a brand new presentation with a natural oak stand. Made from timeless and elegant materials, «Meeting®» has succeeded in combining beauty and practicality.
Is what gives it its unique character.

Caractéristiques de fabrication:
Des lignes nettes et épurées, voici le design Meeting®.
En version tout inox ainsi que dans une toute nouvelle présentation avec un support en chêne de Bourgogne. Matériaux intemporels et élégants, Meeting® sait mêler esthétisme et fonctionnalité.

Cuchillería con revestimiento antiadherente ILAFLON RESIST™
Knives with nonstick coating ILAFLON RESIST™
Couteaux à revêtement antiadhésif ILAFLON TM RESIST™

Características de fabricación:
Sistema de revestimiento antiadherente ILAFLON RESIST™, bi-capa de alta resistencia, con refuerzo cerámico.

Estas dos capas se combinan de forma óptima para crear una película que presenta un excelente efecto antiadherente, de esta forma se consigue que el corte se desprenda fácilmente de la hoja.

- Anti-adherente
- Mayor agilidad al cortar
- Anti-corrosión
- Anti-manchas
- Mejor desinfección y limpieza

Manufacturing characteristics of knives with nonstick coating Knives with nonstick coating ILAFLON RESIST™:
Nonstick coating system ILAFLON RESIST™, with high strength two-layer coating and ceramic reinforcement. These two layers are combined in an optimal way in order to create a film with an excellent nonstick effect. In this way any cut you make will be detached from the blade easily.

- Nonstick.
- Cutting agility.
- Anti-corrosion.
- Stain-resistant .
- Better sanitation.

Caractéristiques de fabrication de couteaux à revêtement antiadhésif
Couteaux à revêtement antiadhésif ILAFLON TM RESIST™:
Système de revêtement antiadhésif ILAFLON RESIST ™, avec haute résistance à deux couches de revêtement et renforcement de céramique.
Ces deux couches sont combinées de manière optimale afin de créer un film avec un effet anti-adhésif excellent. De cette façon, toute tranche que vous faites sera détachée de la lame facilement.

- Revêtement antiadhésif.
- Agilité de coupe.
- Anti-corrosion.
- Résistant aux taches.
- Meilleur assainissement.

Características de fabricación:
SEGURIDAD EN UN DISEÑO PROBADO. Hace más de 30 años, ZWILLING J.A. HENCKELS revolucionaba los estándares para los cuchillos de cocina de alta calidad al crear el mango sintético sin juntas.

- Material de mango: sintético.
- Transición sin juntas del cabezal al mango.
- Acero inoxidable y fundición especial.
- Hoja endurecida al frío con FRIODUR.
- Cuchillos SIGMAFORGE hoja forjada de una única pieza.

Manufacturing characteristics:
SAFETY IN A PROVEN DESIGN. Mora than 30 years ago ZWILLING J.A. HENCKELS revolutionised the standards for top-quality knives with this seamless synthetic handles.

- Handle material: sunthetic.
- Seamless transition from bolster to handle.
- Stainless steel and special smelting.
- FRIODUR knife, ice-hardened.
- SIGMAFORCE knife - forged from one piece.

Caractéristiques de fabrication:
LA SÉCURITÉ D'UN MODÈLE QUI A FAIT SES PREUVES. Il y a plus de 30 ans, ZWILLING J.A. HENCKELS révolutionna les normes des couteaux de qualité optimale avec ces manches synthétique homogènes.

- Manche: synthétique.
- Transition homogène entre la mitre et le manche.
- Acier inoxydable unique, formule spéciale.
- Couteau FRIODUR en acier trempé.
- Couteau SIGMAFORGE - forgé d'une seule pièce.

DetectoGrip, serie detectable
DetectoGrip, detectable series
DetectoGrip, série détectable

DetectoGrip, serie detectable

Para el procesamiento de la carne está permitido únicamente el uso de cuchillos y herramientas con mangos de plástico. Los mangos de material sintético blando albergan un riesgo de desgaste, por lo cual las partículas más finas pueden llegar a los alimentos. Estos problemas se evitan empleando cuchillos y herramientas con mangos firmes de plástico. No obstante, los daños en el cuchillo pueden provocar la contaminación de los alimentos por partículas de metal y de plástico. Al contrario que las piezas metálicas, las partículas de plásticos convencionales no se pueden percibir con detectores y equipos de rayos X. Friedr. Dick presenta la serie de cuchillos detectables DetectoGrip y la afiladora Detecto Steel HyperDrill. Añadiendo piezas metálicas en el plástico, se pueden detectar a partir de ahora las partículas de plástico en los alimentos mediante detectores de metales y equipos de rayos X convencionales. En cooperación con nuestro fabricante de plástico, se ha desarrollado un material mediante el cual se ha mejorado aún más la capacidad de detección de esta mezcla de plástico. Esto ha sido comprobado y demostrado en pruebas internas y externas.

DetectoGrip, detectable series

When it comes to processing meat, knives and tools with plastic handles must be used exclusively. Handles made from soft plastic material hold the risk of abrasion and the finest particles may get into food. This problem can be prevented if knives and tools with hard plastic handles are utilised. Nonetheless, food can be contaminated with metal and plastic particles due to damage to the knife. Unlike metal parts, parts made from conventional plastics cannot be detected with detectors or x-ray devices. A new innovation at Friedr. Dick is the DetectoGrip detectable knife series and the Detecto Steel HyperDrill knife sharpener. By mixing metal parts into the plastic, pieces of plastic can now be detected in food by commercial metal detectors and x-ray devices. In collaboration with our plastic manufacturer, a material has been developed that has further improved the detectability of this plastic mixture. This has been successfully proven in internal and external tests.

DetectoGrip, série détectable

Seuls les couteaux et outils à manche en plastique peuvent être utilisés pour la transformation de la viande. Or les manches en plastique souple présentent un risque d'abrasion et des particules extrêmement fines risquent donc de se retrouver dans les produits alimentaires. Pour éviter ces problèmes, on peut utiliser des couteaux et outils à manche en plastique rigide. Mais là aussi, les aliments peuvent être contaminés par des particules de métal et de plastique si le couteau est endommagé. Contrairement aux particules de métal, les particules de plastique classique ne sont pas détectées par les détecteurs et appareils de radiographie. Friedr. Dick propose maintenant deux nouveaux produits : la série de couteaux détectables DetectoGrip et l'affûteur Detecto Steel HyperDrill. Le plastique utilisé dans ces produits est mélangé à des particules de métal et est donc à présent également détectable par les détecteurs à métaux et les appareils de radiographie du commerce. En collaboration avec notre fabricant de plastique, nous avons mis au point un matériau grâce auquel la détectabilité de ce mélange plastique a encore été perfectionnée. Des tests réalisés en interne et en externe ont permis de contrôler et confirmer cela.

Cuchillos contrapesados
Counter-balanced knives
Couteaux contrebalancés

Características de fabricación:
Al empuñar y manejar un cuchillo debemos asegurarnos que nos sentimos cómodos y que el centro de gravedad es el adecuado a nuestra forma de utilizarlo.
Algunos cuchillos, incluso tienen la posibilidad de variar el centro de gravedad, insertando piezas de diferente peso hasta conseguir la mejor sensación para cada usuario.
Los cuchillos de calidad tienden a tener muy buen equilibrio sin demasiado peso ya sea en la cuchilla o en el mango.
Un cuchillo de calidad y bien equilibrado se equilibrará en ese punto y no se caerá de su dedo.

Manufacturing characteristics:
Wielding a knife handle and we must ensure that we are comfortable and that the center of gravity is the right way to use our.
Some knives, even have the possibility to vary the center of gravity, inserting pieces of different weight to get the best feel for each user.
Quality knives tend to have very good balance without too much weight either the blade or the knife mango.
Un quality and well balanced will be balanced at that point and will not fall off your finger.

Caractéristiques de fabrication:
Brandissant une poignée de couteau et nous devons nous assurer que nous sommes à l'aise et que le centre de gravité est la bonne façon d'utiliser notre. Certains couteaux, ont même la possibilité de faire varier le centre de gravité, en insérant des morceaux de différents poids pour obtenir la meilleure sensation pour chaque utilisateur. couteaux de qualité ont tendance à avoir un très bon équilibre sans trop de poids, soit la lame ou la qualité de mango.Un couteau et bien équilibré sera équilibré à ce moment-là et ne tombent pas votre doigt.

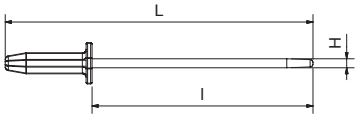
Chaira cerámica
Ceramic sharpener
Fusil à aiguiser en céramique

Sus principales ventajas son su ligereza y una mayor vida útil frente al resto de chairas.

Fabricada con cerámica de alta y avanzada tecnología.

Recomendada para cuchillos fabricados con aceros y aleaciones especiales de cuchillería, como molibdeno-vanadio, CROMOVA 18, etc. Nó válida para cuchillos cerámicos.

Excelente resultado del afilado.



L	I	H	Gr			€
380	245	14,00	160	○	447206	**40,00**

Its main advantages are its lightness and durability compared with other sharpeners.

Made of high and advanced technology ceramic.

Recommended for knives manufactured with steel and special alloys for knives, such as molybdenum-vanadium, CROMOVA 18, etc. It is not valid for ceramic knives.

Excellent sharpening results.

Ses principalles avantages sont sa légèreté et de durabilité par rapport à d'autres taille.

Fabriqué en céramique de haute et advancée technologie.

Recommandé pour les couteaux fabriqués avec des aciers et alliages spéciaux, tels que le molybdène vanadium, CROMOVA 18, etc Il n'est pas valable pour les couteaux en céramique.

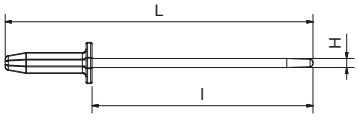
Excellente netteté des résultats.

Chaira diamantada
Diamond sharpener
Fusil à aiguiser diamanté

Su principal ventaja es la posibilidad de afilar todo tipo de **cuchillos**, incluso los **cerámicos**.

La hoja de acero cubierta de diamante en polvo permite obtener un resultado particularmente fino de afilado. La capa de diamante se desgasta con el tiempo, acortando poco a poco la vida útil del utensilio. Se recomienda utilizarla complementariamente a la chaira de acero.

El mango inyectado en polipropileno proporciona gran ergonomía a la vez que firmeza en la sujeción, con diseño protector y anilla para colgar.



L	I	H	Gr			€
440	305	20>10	295	⬭	447208	**67,00**

Its main advantage is the possibility of sharpening all kind of **knives**, even the **ceramic** ones.

The steel blade covered with diamond powder has as a result a especially fine blade sharpening. The diamond layer wears out over time, shortening gradually the life of the tool. It is recommended to use it alternatively with the steel sharpener.

The injected polypropylene handle offers a great ergonomics together with firmness in gripping, a protective design. Provided with hanging ring.

Ses principalles avantage est la possibilité d'affûter tous les types de **couteaux**, même les **céramiques**.
La lame en acier recouvert de poudre de diamant a la suite d'un aiguisage de la lame particulièrement fin. La couche de diamant s'use au fil du temps, le raccourcisse progressivement la durée de vie de l'outil. Il est recommandé de l'utiliser en alternance avec le fusil à aiguiser en acier.

La poignée en polypropylène injecté offre une grande ergonomie avec fermeté à saisir et une conception de protection. Fourni avec anneau de suspension.

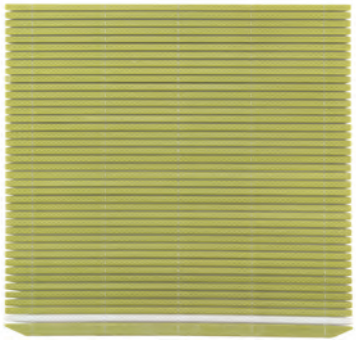
Enrollador de maki super-higiénico

Sushi rolling mat, ultra-hygienic
Enrouleur de maki super-hygiénique



Novedad
New
Nouveau

Los mejores enrolladores super-higiénicos de makis con gran capacidad antiadherente del arroz.
Un enrollador revolucionario que no hace uso de las tradicionales varitas de bambú ni del algodón para su cosido, sino de plásticos y monofilamentos avanzados.
No sólo son higiénicos, sino también fáciles de rodar como un enrollador tradicional.
Principales ventajas:

- Apto para lavavajillas.
- No genera astillas o moho negro, como los bambúes convencionales.
- Los monofilamentos del cosido repelen la contaminación.
- Menor probabilidad de que el arroz se adhiera a sus superficies en relieve.
- Rápido secado para poder ser utilizado después del lavado.
- Tan fácil de rodar como los enrolladores convencionales de bambú.

Les meilleurs enrouleurs super-hygiéniques de makis avec une grande capacité antiadhésive du riz.Un enrouleur révolutionnaire qui n'utilise pas les traditionnelles baguettes de bambou ni du coton pour sa couture, sinon des plastiques et des monofilaments avancés.Non seulement ils sont hygiéniques, mais aussi faciles de rouler comme un enrouleur traditionnel.
Avantages principaux :

- Aussi facile de rouler que les conventionnels en bambou.
- Ne génère pas d'éclats ou de moisissure noire, comme les bambous conventionnels
- Les monofilaments de couture repoussent la contamination.
- Une probabilité moindre que le riz s'adhère à ses surfaces en relief.
- Apte pour le lave-vaisselles
- Sèche rapidement pour pouvoir être utilisé après le lavage.

The best makisu ever that are super hygenic and less likely to stick to rice.
A revolutionary makisu that makes use of neither the traditional bamboo nor cotton strings but advanced plastic and monofilaments.
They are not only hygienic but also easy to roll as a makisu.
Designed with several benefits below.

- Dishwasher safe, bleach safe.
- Does not generate splinters or black mold, like the those conventional bamboo ones always does.
- The monofilaments that deter contamination are used for the binding strings.
- Rice less likely to stick to its embossed surfaces.
- Easy to dry so that can be used soon after washing.
- Yet as easy to roll as conventional bamboo ones.
